

INDEX

- Abstracts, searching, 12.
- Academic libraries, computer-assisted instruction, 127-35; development of service, 78-90; New York Times Information Bank use, 23; UCLA/UGA user study, 56-77.
- Acquisitions, data base use impact, 7, 14.
- American National Standard for Bibliographic Information Interchange on Magnetic Tape, 9.
- Australia, data base overview, 111-26.
- BASEBALL (natural-language system), 138-39.
- Batch systems, Bell Laboratories, 47-50; file structures, 6.
- BELDEX (indexing system), 48, 50-51.
- Bell Telephone Laboratories, information retrieval methods, 31-55.
- Bibliometric research, 42-43.
- CA CONDENSATES, compared to Chemical Abstracts, 46-47.
- Center for Information Services (CIS) (UCLA), user study, 57-77.
- Chemical Abstracts, compared to CA CONDENSATES, 46-47.
- Community information centers, 103-10.
- Computer-assisted instruction (CAI), 129-35.
- Consortium, New York Times Information Bank, 27-29.
- Contract negotiation with vendors, NASIC services, 86-87.
- Cooperation, impact of automation, 147-48; NASIC, 83-90; New York Times Information Bank use, 27-29.
- Costs, academic libraries, 82-83; computer-assisted instruction, 130-31; DIALOG, 39, 41; manual vs. machine searching, 35-36; NASIC, 88-89; New York Times Information Bank, 24-26, 28; processing centers, 13-14.
- County records system, 104-08.
- Current awareness service, *see* SDI.
- Data bases, 3-15.
- Demonstrations, *see* promotion of service.

- DIALIB, 92-99.
- DIALOG system, Bell Laboratories use, 39-44, 53; costs, 35-36; public library use, 92-102.
- Direct user access, *see* User access, direct.
- Document delivery, 151-52; convenience and service use, 146-47; New York Times Information Bank, 24; processing centers, 10.
- Duplicate references, problems of elimination, 45-46.
- Education of users *see* User education.
- File structure, data base searching, 5-6, 11-12; machine-readable output, 38.
- Frame theory, 143-44.
- Georgia Information Dissemination Center (GIDC), user study, 57-59, 72-77.
- Indexing, BELDEX system, 48, 50-51; county records system, 104-08.
- Interlibrary loan, data base use impact, 7.
- Intermediaries, 78-90; Bell Laboratories, 36; New York Times Information Bank, 21-22; removal of, 149; UCLA/UGA study, 60-72, 76.
- Interview, reference, user study, 61-66.
- KWIC (Key Word in Context), BELDEX indexing system, 51.
- Lister Hill National Center for Biomedical Communications, 129-35.
- Logic (searching), types, 12-13.
- LUNAR (natural-language system), 139.
- Magnetic tape, machine-readable output, 37-38.
- MARGIE (natural-language system), 141-43.
- MICROPLANNER (programming language), 140-41.
- Minicomputers, computer-assisted instruction, 134.
- Minsky, Marvin L., frame theory, 143-44.
- NASIC (Northeast Academic Science Information Center), 78-90.
- National Library of Medicine, computer-assisted instruction, 129-35.
- National planning, Australia, 116-24.
- Natrona County Public Library, 103-10.
- Natural-language systems, question-answering, 137-44; user orientation, 150.
- Networks, Australia, 122-24; brokerage of services, 87; computer-assisted instruction, 130-33; public libraries, 109-10; user interface model, 74-76.
- New York Times Information Bank, 17-29.
- Off-line systems, *see* Batch systems.
- On-line systems, 148; academic libraries, 84; computer-assisted instruction, 127-35; DIALOG, 38-46, 91-102; file structures, 5-6; New York Times Information Bank, 17-29; public libraries, 91-102.
- Output, 11; batch-processing, 48-50; machine-readable, 36-38.
- Processing centers, academic, 57; disadvantages of, 34-35; evaluation of, 9-14.
- Profiles, 7; construction, 60, 64-69; revision, 71-72.
- Promotion of services, Bell Laboratories, 39; NASIC services, 82, 86; neglect of, 155; New York Times Information Bank, 26.
- Public libraries, community information center, 103-10; DIALOG use

- study, 91-99; New York Times Information Bank, 27.
- QED (programming language), 48.
- Reference interview, user study, 61-66.
- Reference librarian, *see* Intermediaries.
- Retrospective searches, 6-7.
- SDI (selective dissemination of information) service, 6-7; document delivery, 151; time lag, 153-54.
- Search strategy, logic types, 12-13; multiple data bases, 46; user participation, 97-98.
- Search terms, New York Times Information Bank, 18; truncation, 13.
- Search time, DIALOG, 39-40; New York Times Information Bank, 23; public library study, 93.
- SHRDLU (natural-language system), 140-41.
- Special libraries, Bell Laboratories, 31-55; New York Times Information Bank use, 23.
- Staff, data base impact, 14; New York Times Information Bank, 21-22; training, 84-85.
- Standardization, need for, 9, 53, 76, 79, 121-22.
- Terminals, intelligent, 134; placement, 19.
- TYMSHARE, computer-assisted instruction, 130-33.
- UCLA, user study, 56-77.
- University of Georgia (UGA), user study, 56-59, 72-77.
- User access, direct, 79-81, 149; Bell Laboratories, 26; New York Times Information Bank, 21-22.
- User education, 154; NASIC services, 86; public libraries, 95-98.
- User studies, convenience and use of service, 146-47; evaluation, 152-53; medical research in Australia, 120; public library, 96-97; UCLA/UGA, 56-77.
